EXPERIENCE

Fullstack Web Programmer (Freelance)   06/2024 - Present
PT Smart IT Mantap Digital Indonesia ↗

- Collaborated with a team of 5 to analyze database requirements and enhance a previously developed logistics-focused ERP project, integrating client revisions into the existing system.
- Managed deployment by pulling code changes from Git to the live server using PuTTY.

Fullstack Web Developer (Full Time)   03/2023 - 06/2024
PT Smart IT Mantap Digital Indonesia ↗

- Collaborated with a team of 5 to develop the core codebase and analyze database requirements for a logistics-focused ERP project, consisting of four modules (workshop, warehouse, operational admin, and operational driver), from scratch. Ensured adherence to predefined flowcharts and project specifications.
- Designed and created a comprehensive website prototype using HTML, CSS, and Bootstrap to visualize and iterate on user interface by optimizing the given templates.
- Developed inbound APIs for integration with mobile applications for drivers and 4 additional modules in an ERP project.
- Collaborated with the client's development team to integrate various modules using inbound and outbound APIs.
- Managed deployment by pulling code changes from Git to the live server using PuTTY.
- Conducted training with the client's staff or the application users on operating the system, ensuring the workflow aligned with user requirements.

Web Developer Intern   09/2021 - 06/2022
PT Piramida Teknologi Informasi - Surabaya, Indonesia

- Implemented the mockup design into the website interface using HTML Twig, CSS, and Bootstrap, and got approval from analysts that the website interface is 100% accurate according to the requested design.
- Led a team of developers to design and implement a database for the E-Office project which will be used to manage all of the office activities of about 40 employees in PT Piramida Teknologi Informasi and successfully solving issues and made improvements to the database, while ensuring all work meets the necessary requirements.
- Teamed with 4 people to develop an interactive E-Office website for PT Piramida Teknologi Informasi to maximize the process of work activities and data processing related to the office.
- Assisted senior programmers in making additional features related to the procurement of goods and services for about 6000 procurement packages data based on client requests on websites that are under development, namely E-Reporting PBJ.

Backend Developer Intern   06/2021 - 08/2021
PT Madani Jayantara Indonesia - Malang, Indonesia

- Analyzed the flow of the survey manager website application with the developer team so it can 100% meet the application's target audience and goals.
- Built reusable code using Laravel Framework for survey manager web applications, so the frontend developer can reuse the code that I've already written easily.
- Teamed with 4 people to create and implemented a database for a survey manager web application led by the director of PT Madani Jayantara Indonesia and make improvements to the database, while ensuring all work meets the requirements.
- Created accurate API documentation for API consumers.
